

Security Policy

Excellence Logging is committed to optimizing Security management to minimize exposure of personnel, assets and information to potential threats.

Our Goals are: to protect people, assets, information and reputation; to put in place appropriate planning, with tested contingency measures - including specific communication procedures to support our personnel and other involved parties; to spread a strong security culture that supports our business and priorities.

Company Management holds the responsibility to ensure the requirements of this policy are communicated, understood and applied to all employees, contractors, suppliers, consultants, temporary staff and all personnel affiliated with third parties working for Excellence Logging.

Our requirements are: to identify potential threats, vulnerabilities and apply proportionate controls to reduce the risks to people, assets and information to an acceptable level; to prevent deterioration of a crisis situation; to set up clear and effective channels of communication; to maintain confidentiality, integrity and security of data.

People and behaviours are essential to good security. Security planning, training and promoting to provide for adequate protection will not be compromised. Everyone is encouraged to identify risks and provide opportunities. We will support initiatives for continuous improvement of the OMS.
