

Waste Management Policy

Excellence Logging is committed, as a central aspect of its overall environmental performance, to implementing an efficient and safe waste management. By **Risk Minimisation** and encouraging **relevant, adapted and suitable** Risk Control and Regulatory Compliance in our activities and product lifecycles we will monitor the critical risk controls, identify protective counter-measures (barriers) and prevent major incidents.

Our Goals are: to comply with waste management legislation and all the applicable rules and regulations, to identify and minimise the quantity of waste generated through our activities, to encourage re-use of products or recycling scheme whenever possible to reduce the environmental impact of waste disposal, to ensure safe handling and storage of waste.

Company Management holds the responsibility to ensure the requirements of this policy are communicated, understood and applied. All employees, contractors, suppliers, consultants, temporary staff and all personnel affiliated with third parties working for Excellence Logging must respect this policy.

Our requirements are: to not produce no more waste than necessary through the 3R (Reduce, Reuse, Recycle), to dispose of waste in an environmentally acceptable manner, to impede uncontrolled discharge of waste into the environment, to provide all staff with the indispensable awareness and training on waste management issues, to use sustainable, reusable or recyclable means whenever technically and economically feasible.

Promoting waste management enables all of us to understand how to actively contribute and change behaviours. **Everyone** at all levels is encouraged to identify risks and opportunities. We are determined to provide the necessary resources to achieve our goals and will support initiatives for continuous improvement of the OMS.
